

Geological periodicals in EPA

2016/02/18

A new periodical entitled *Földtani kutatás* (*Geological Research*) was added to the Electronic Periodical Archive & Database (EPA). The archive has been created jointly by NSZL, the Hungarian Office for Mining and Geology and the Hungarian Geological Society. The entire content of EPA can be accessed free of charge.

Due to a collaborative effort between National Széchényi Library/EPA, the Hungarian Office for Mining and Geology and the Hungarian Geological Society, scientific journal entitled *Földtani kutatás* (*Geological Research*) has been archived. The material of all the volumes of the periodical can be accessed in full text and with tables of content on the site of [EPA](#) [1].

Other geological periodicals can also be accessed in EPA, in full text and content, including:

- [Földtani Közlöny](#) [2] (*Geological Bulletin*)
- [Őslénytani viták](#) [3] (*Paleontological Debates*)
- [Általános földtani szemle](#) [4] (*General Geological Review*)
- [A Magyarhoni Földtani Társulat munkálatai](#) [5] (*Works of the Hungarian Geological Society*).
