

Convicts are also digitizing

2017/04/19

Just like in previous years, there is cooperation between our Library and Győr-Moson-Sopron County Remand Prison. In the future, convicts can help with scanning great quantities of files that can be quickly digitized. At the same time, no further steps related to their processing of documents can be excluded.

Cooperation agreement on joint digitization between [Győr-Moson-Sopron County Remand Prison](#) [1] and Dr. Pál Kovács County Library and Community Space, which has resulted in fruitful cooperation for a year now, seems to be expanding with the partnership of National Széchényi Library, according to a verbal agreement made by the parties on April 12, 2017 in the Győr-based remand prison. Detailed plans are yet to be worked out, but one thing is for sure: "content available for the general public" will be generated in the wake of the joint project.
