Temporary IT services outage from 5 p.m. on June 3 until the morning of June 4

2019/06/03

As part of the renewal of NSZL’s IT network infrastructure, devices of the internal network will be replaced. Services of the Library will not be available for several hours.

The IT network infrastructure of National Széchényi Library will be renewed by state-of-the-art devices. As part of the process, the devices of our internal network will be replaced starting at 5 p.m. on Monday June 3, 2019. Due to the replacement, services of the Library will not be available for several hours, and there will be no internet access on the premises of NSZL.

Work and the relaunch of services will take at least eight hours, so in an optimal case, the majority of services will be available Tuesday morning. Should unforeseen problems occur, the process may be delayed. We are going to publish information on the relaunch of our services and also on any possible problems, provided our communications channels make it possible.

Thank you for your understanding and cooperation.
