Service outage on the morning of 21 June

2021/06/17

Maintenance of the transformer station supplying our library

Dear Readers!

We would like to inform you that on June 21, 2021 (Monday) between 8 am and 12 am, ELMŰ Network Ltd. will carry out maintenance work on the transformer station supplying our library. During this period there will be a power outage in the building of the NSZL and the remote access (internet access) will also be interrupted due to the power outage in the server room.

During this period, only the Hungarian Electronic Library [1], the Electronic Periodicals Archive [2] and the Digital Image Archive [3] will be available, and we will also be able to receive e-mails.

The majority of our internet services, including our central website (oszk.hu), our catalogue and our content services, are expected to be available again at 1 pm.

Thank you for your kind understanding.
